Aims and scope

Chinese Chemical Letters (CCL) (ISSN 1001-8417) was founded in July 1990. The journal publishes preliminary accounts in the whole field of chemistry, including inorganic chemistry, organic chemistry, analytical chemistry, physical chemistry, polymer chemistry, applied chemistry, etc., satisfying a real and urgent need for the dissemination of research results, especially hot topics. The journal does not accept articles previously published or scheduled to be published. To verify originality, your article may be checked by the originality detection service CrossCheck.

The types of manuscripts include the original researches and the mini-reviews. The experimental evidence necessary to support your manuscript should be supplied for the referees and eventual publication as Electronic Supplementary Information. The mini-reviews are written by leading scientists within their field and summarized recent work from a personal perspective. They cover many exciting and innovative fields and are of general interest to all chemists.
